
Pictures in forum posts

Posted by Cobb - 2008/03/05 09:27

When I went to post my own image inside a post today, I noticed that I was only allowing images that were 50k or less. That limit really doesn't allow much of a picture at all, so I have increased this limit to 1000k. When including a picture inside a forum post, please also consider the width. I have the limit set at 499. Please resize if you'd like to include in a post.

Thanks!
