
Dog packs

Posted by Scared Wild - 2008/03/08 13:01

I am currently looking for a pack for my 2 year old lab/husky mix. Ruff Wear and Kelty backpacks seem to be the favorite on the market. Does anyone have any experience with these? Thanks!:unsure:

I have a ruff wear pack for my lab and I really like it. I haven't had any problems with it and we have been using it for a couple of years now. It rides on him well and we have not had any chafing problems or anything of the sort. We have the large approach pack.

Thanks Rock steady. Maybe I should go with the ruff wear then. Not too many people have had any problems. Thanks again.

I'm glad you fellas where talking about dog packs. Once my pup finishes growing I plan to pick one up so she can share the weight.
